

## Personal Data

Name: Jan-Willem van Bremen  
Address: Welnastraat 87  
Postal Code and city: 1096GJ Amsterdam  
Phone Number: +316 57118462  
Email: [janwillemvanbremen@live.nl](mailto:janwillemvanbremen@live.nl)  
Website: [jwvbremen.nl](http://jwvbremen.nl)  
Birthdate: 10-10-1998  
Birthplace: Amsterdam  
Nationality: Dutch

I am a diligent full-stack web developer that is very social and efficient. I have always experimented with software and hardware and I like uncovering problems at the core and solving these with flexible solutions. I enjoy building front and back-end software systems with modern (web)technologies and writing clean & concise code.

## Education

2017 – 2021: **Amsterdam University of Applied Sciences**  
Study: HBO-ICT | Field: Software Engineering  
Graduation assignment: Kabisa B.V. - Headless infrastructure in the context of E-Commerce platforms

2014 – 2017: **ROCVA Amsterdam South-East**  
Study: ICT | Field: Application Development

## Employment

2024-Now: **VeraConnect B.V. Amsterdam | Full-Time - Full Stack React (Native) Developer (Via Team Rockstars IT)**  
*Vera Connect is a start-up with the goal to make privacy practical and therefore life more fun! They do this by offering a software suite so that their users can make secure connections with others. I have contributed to several software projects and significant features including a Cross-Platform React Native App, multiple React web projects and the Back-End server/Api based on Express.js and Prisma ORM (PostgreSQL).*

2022-2024: **Road.io (Formerly E-Flux), Amsterdam | Full-Time - Full Stack Web Developer (Via Team Rockstars IT)**  
*Contributing to their Electric Vehicle charging platform dashboard and Api's. Notable achievements: Integrated 3rd party smart-charging provider into the platform, migrated to new ERP system; NetSuite & integrated the Gireve international Roaming Hub. Using Node.js, TypeScript, React, MongoDB, Mongoose, Koa & more!*
